FieldCaption

By Darkwater Strategies LLC

Photos from the job. Reports ready to send.

Photo captions, annotations and observations become clear, company-branded PDF reports on your iPhone. Also supports iPad.

Capture. Clarify. Deliver.

Take or import the photo. Add the location, finding and action note. Mark the image, then generate a report with your company details and a cover.

Built for field documentation

Contractors and roofers: explain the issue and repair area.

Property maintenance: keep equipment tags with observations.

Inspectors and field technicians: organize findings by location.

Photo tools: arrows, text, numbered points, shapes and retained originals.

Output: Letter or A4, branded cover, share, Save to Files and print.

Backup: save and restore complete copies of local work.

FULL UNLOCK

$29.99 USD

One purchase. No subscription.

Try three successful PDF generations free. Revisions count; failed generations do not. Free generation requires iCloud and internet.

Unlock unlimited photo editing and PDF output. Regional App Store prices vary.

Reports and photos stay in app-owned storage on your device. Apple handles purchases and a small private-iCloud record coordinates the allowance. Verified paid access works offline on that device. Back up your local work; restoring a purchase restores access, not reports.

Watch the app. Explore sample reports.
